Description of the Functional Principle

The special version "low-noise channel" Wiesbaden Silent is a development for considerably reducing the noise level. Compared to a conventional Wiesbaden channel, it is reduced by approx. **10 dBA** at a water quantity of 6 m³/h per 1 m of channel. This solution is based on a complex combination of channel shape, arrangement of cover gratings and specially designed supporting strip for the gratings. Warranty claims can only be asserted if transverse gratings from "AGROB BUCHTAL" are used.
